

# 150 and 175 Watt Ka-Band Antenna Mount High Power Amplifiers

## FEATURES

- *Compact 46 lb. antenna mount package*
- *RS-232/422/ 485 M&C interface*
- *Ethernet option*
- *Linearizer option*

The **XTD-150Ka** and **XTD-175Ka** series are compact self contained antenna mount power amplifiers designed for low cost installation and long life. Cooling and monitor & control systems are all self contained within the amplifier. These highly compact units typically weigh only 46 pounds. Alternative frequency coverage is available.

These amplifiers have built-in waveguide switch control capability. This can be used in a 1:1 redundancy configuration. A single RS-485 cable can control two amplifiers and redundancy switch.

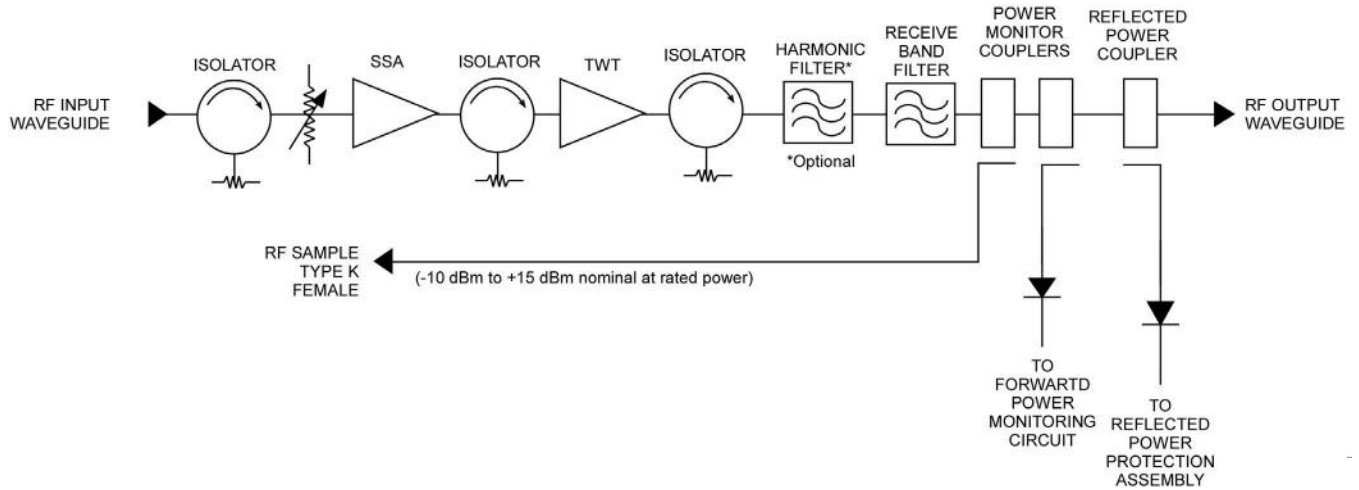

The amplifiers are available with multiple options including redundant and phase combined system configurations, integral linearizers and harmonic filters. Remote external controllers are available to operate the HPA from a user selected location.
