Q-LAAMP

Quintech Lab Automation and Management Package

General Description:

Quintech Electronics proprietary Laboratory Automation and Management Package, Q-LAAMP, provides lab managers the ability to manage and allocate resources such as base stations and RF instruments among many shared users. Using the NEXUS RF Matrix, this software manages resource allocation to labs and users without a patch panel and manual operations. Its web-based user interface provides easy access from any PC or tablet browser. Vendors and employees can login to Q-LAAMP using their existing accounts through RADIUS Server Authentication. **Q-LAAMP** also includes other intuitive features that facilitate testing, monitoring and troubleshooting.

Q-LAAMP makes lab management and resource sharing easy and significantly increases lab efficiency, reduce test time and save costs.

Features & Benefits:

- Schedule and resource management
 - Enables multiple users to share the same lab environment
- Shared resources can be independently allocated
- Secure remote control and access to Q-LAAMP to avoid unauthorized changes
- Supports local and RADIUS server-based user Authentication, Authorization and Accounting (AAA) management
- Color-coded port level monitoring allows quick troubleshooting
- Port labeling to avoid confusion in a multi-user changing lab environment
