

WORK Microwave's high-speed DVB-S2 IP modem SK-IP provides operators with a platform for transferring IP/Ethernet data over DVB-S2 satellite connections. Ethernet frames and IP packets are encapsulated directly within DVB-S2 baseband frames, resulting in low encapsulation overhead.

In order to achieve speeds up to 356 Mbit/s, only the fastest and most bandwidth efficient encapsulation and modulation parameters are supported. For maximum bandwidth efficiency and ease of operation the device uses Generic Stream Encapsulation according to TS 102 606 and Multiprotocol Encapsulation according to EN 301 192.

The modem SK-TS is used for transmitting and receiving signals as MPEG transport streams. DVB-S as well as DVB-S2 modulation types are supported.

### **DaVid technology**

Utilizing DaVid technology, WORK Microwave's DVB-S2 Modem SK-DV system offers simultaneous transportation of IP data (i.e., network connection) and live broadcasting (i.e., video content) over a single satellite carrier. The DaVid technology works by aggregating multiple transport streams and IP data into a DVB-S2 multiplex while providing end-user control of all transmission types.

### OptiACM

An integrated OptiACM controller provides adaptive or variable FEC- and modulation setting for point-to-point or point-to-multipoint IP applications.

### VideoACM

An integrated VideoACM controller provides adaptive or variable FEC- and modulation setting for point-topoint or point-to-multipoint Transport Stream transmissions.

### Predistortion

Broadcast Predistortion and Extended Predistortion operating in the background during regular transmission - mitigates the negative effects in the filters and amplifiers of satellites by automatically compensating for linear and non linear distortions. Subsequently the satellite link can be operated with less back off/higher power and a higher signal-tonoise ratio increases beam coverage ensuring higher throughput and availability for the satellite operator.

### Flexible RF connectivity

The modulator provides the modulated signal from 50 to 180 MHz IF or at L-band. With the L-band output, a 10 MHz reference signal for a block upconverter can be enabled on the TX port, as well as DC power 24 V or 48 V (Option DC24 or DC48).

The demodulator accepts an L-band signal in the range from 950 to 2150 MHz on two inputs or alternatively an IF signal in the range from 50 to 180 MHz on a single input. On L-band devices, LNBs can be powered directly over the inputs.

### High signal integrity

Low spurious emissions make the modem perfect for use in environments with demanding requirements, like high-power uplinks. Sophisticated temperature compensation guarantees output stability over a very wide temperature range.

# Operating and control - easy integration into your system

The modem can be operated via push buttons on the front panel using intuitive display menus or via remote control (RS232, RS422/485 and TCP/IP over Ethernet). For the remote control addressable packet-based commands, a Web interface (HTTP browser) or SNMP can be used. Detailed monitoring of system parameters is possible.

#### Key features

- DVB-S2 ETSI EN 302 307-1
  DVB-DSNG ETSI EN 301 210
  DVB-S ETSI EN 300 421
- DVB-S2 modulations: QPSK / 8PSK / 16APSK / 32APSK normal, short
- DVB-S and DVB-DSNG: QPSK / 8PSK / 16QAM modulation (SK-TS)
- DVB Carrier ID ETSI TS 103 129
- Broadcast Predistortion including automatic group delay and dynamic constellation predistortion for QPSK and 8PSK (option XB)
- Extended Predistortion including automatic group delay and static constellation predistortion up to 32APSK (option XE)
- Normal and short FEC frames, pilots on or off (DVB-S2)
- Physical layer framing with scrambling codes 0 to 262141 according to DVB-S2 standard
- Symbol rates from 500 ksps to 80 Msps
- Roll-Off: 35 %, 25 %, 20 %, 15 %, 10 %, 5 %
- Adjustable digital gain slope equalizer
- Low spurious output
- An output signal multiplexer integrated within the L-band version allows to combine the modulated signal, the 10 MHz reference signal and DC power (option DC24 or DC48) to drive an external power block upconverter
- Automatic integrated uplink power control (option)
- DISEqC 1.1 support on LNB L-band input
- OptiACM system for optimized bandwidth usage and extended weather insensitivity for IP transmission
- Gigabit Ethernet data interface
- IP and baseband traffic shaping
- Generic Stream Encapsulation (GSE) direct to DVB-S2 baseband frames
- Multiprotocol Encapsulation (MPE)
- Operates as Layer 2 Bridge, Layer 3 Bridge or Layer 3 Router
- 2 ASI Input and 2 ASI Output Interfaces (SK-DV, SK-TS)
- Transport Stream Input for DVB-S2 Multiple Input Stream operation, capacity calculator, optional capacity limitation per TS input (SK-DV only)
- Transport Stream over IP Inputs (option TI1,TI2) (SK-DV, SK-TS only)
- Support of 2 Multiple Transport Stream Inputs and Outputs (SK-DV, SK-TS)

- VideoACM system for optimized bandwidth usage and extended weather insensitivity for Transport Stream video transmission
- BISS-E encryption of transport streams on transmit side (option BI), supports multi program transport stream
- Transmit mute input
- Tx Monitor Output on Frontpanel
- Remote control through RS232, RS422/485 (2wire or 4-wire) interfaces, TCP/IP over Ethernet, Web browser interface, SNMP with MIBs downloadable form the device
- 10 MHz Reference OCXO included
- Summary alarm output with dual change over switch contacts
- Operating temperature range 0 °C to 50 °C (32 °F to 122 °F)
- CE compliant
- 3 years warranty

#### Open questions, demo units

If you need more information about WORK Microwave's satellite modulators or if you would like to have demo a unit, please contact us via e-mail: sales@work-microwave.com or call us. We are glad to assist you.

Common Parameters:	SK-IP / SK-DV / SK-TS			
Baseband Channels:	16 baseband channel with separate DVB-S2 baseband settings			
	(MODCOD, FEC frame length, pilots, encapsulation type, multistream ID, timeout)	(SK-IP, SK-DV only)		
OptiACM:	CCM / VCM / ACM functionality for point-to-point and point-to-multipoint links			
	16 ACM channels with separate MODCOD range and Es/N0 sensitivity			
	ACM channels arbitrary assignable to baseband channels	(SK-IP, SK-DV only)		
BB Traffic Shaper:	Baseband channel limits based on symbol rate for virtual share of the carrier			
·	Guaranteed and limited bandwidth individually configurable	(SK-IP, SK-DV only)		
Data Interface:	Ethernet (1xRJ-45, 10/100/1000 Mbps auto sensing)	(0)		
IP Data Rate:	up to 356 Mbps or 80000 pps	(SK-IP, SK-DV only)		
Network Operation:	Layer 2: Bridge (Ethernet frame transmission)			
	STP/RSTP			
	Layer 3: Bridge/Router (IP packet transmission), IPv4, IPv6			
	256 IP/subnet routes per port			
	16 DVB-S2 baseband channels	(SK-IP, SK-DV only)		
Data Encapsulation:	Generic Stream Encapsulation (GSE) according ETSI TS 102606			
Data Encapsulation.	Multiprotocol Encapsulation (MPE) according to ETSI EN 301192	(SK-IP, SK-DV only)		
IP Traffic Shaper:	64 independent rules			
	Guaranteed and limited bandwidths			
	Fixed or dynamically integrated into ACM (bind to MODCOD)			
	Match criteria: source/destination IP subnet, source MAC, UDP/TCP port ranges, TO	S/DS field nacket size		
	(Active IP Traffic shaper reduces max. packet rate to typ. 50000 pps)	(SK-IP, SK-DV only)		
Transport Stream Security	BISS-E Scrambler on transmit side, compliant to EBU Tech 3292 rev. 2	(SK-DV, SK-TS only)		
(Option BI):	For use with unit supporting 1 Multiple Transport Stream input.	(SR-UV, SR-13 UNIY)		
	Supports Single or Multi Program Streams in BISS Mode 0, 1 and E			
	BISS Mode 0: no scrambling, MPEG transport stream is transferred untouche	ad		
	BISS Mode 1: MPEG transport stream is scrambled using 12-hexadecimal-cl			
	BISS Mode E: MPEG transport stream is scrambled using a session word wh			
	16-hexadecimal-character Encrypted Session Word and 14-hexadecimal-character Injected			
	Identifier Max input rate for Clear Section Word and Engrupted Section Word:			
	Max. input rate for Clear Session Word and Encrypted Session Word:			
	- 10 times per 5 minutes - 1 time per 10 seconds			
	- Tume per To seconds			
	Important note: Option BI operates exclusively with single stream operation.			
Broadcast Predistortion (Option XB)	Hardware and signal processing can be enabled through customer field selectable fin	aware options		
Extended Predistortion (Option XE):	An external windows PC is required to run the application program, which optimizes t

Specifications are subject to change

#### **Order Information:**

#### SK-[Device Type]-[Output Band Output Imp]-[Input Band Input Imp]-[Hardware Options]

#### **Device Types:**

- IP DVB-S2 IP Modem
- DV DaVid Technology Modem (combination of TS and IP into one carrier)
- тs DVB-S/S2 Transport Stream Modem

#### Hardware Options are:

lardware	Options are:	Cannot be combined with:	Available for:
DC24	24 V DC power on L-band output	DC48	SK-IP, SK-DV, SK-TS
DC48	48 V DC power on L-band output	DC24	SK-IP, SK-DV, SK-TS
TI1	one TS over IP input interface	TI2	SK-DV, SK-TS
TI2	two TS over IP input interfaces	TI1	SK-DV, SK-TS
BI	BISS scrambling and descrambling for Transport Stream	MT2	SK-DV, SK-TS
MT2	Support of 2 Multiple Transport Stream inputs and outputs	BI	SK-DV, SK-TS
Soiftware	Options are:	Cannot be combined with:	Available for:

\_

#### Soiftware Options are:

- BBO Baseband frame input and output
- ΧВ Broadcast Predistortion
- XE Extended Predistortion

#### Modulation options as per following table:

Modulation Option	Max Symbol Rate, Supported Modulation Types and other Features DVB-S2
- P2L	15 Msps, QPSK / 8PSK
- P2N	30 Msps, QPSK / 8PSK
- P2M	45 Msps, QPSK / 8PSK
- P2H	60 Msps, QPSK / 8PSK
- P2E	80 Msps, QPSK / 8PSK
- A2L	15 Msps, QPSK / 8PSK / 16APSK / 32APSK
- A2N	30 Msps, QPSK / 8PSK / 16APSK / 32APSK
- A2M	45 Msps, QPSK / 8PSK / 16APSK / 32APSK
- A2H	60 Msps, QPSK / 8PSK / 16APSK / 32APSK
- A2E	80 Msps, QPSK / 8PSK / 16APSK / 32APSK
S	Support of Roll-Off-Filters down to 5%

Software Options are not part of the device order code and will be listed separately

#### Examples:

SK-IP-L50-L75-DC24 SK-IP-V50/L50-V75/L75 SK-DV-V75/L50-V75/L75 IP Modem with L-band Output 50  $\Omega$  and L-band Input 75  $\Omega,$  DC24 Volt IP Modem with VHF-band and L-band Output, VHF-band and L-band Input DaVid Technology Modem with VHF-band and L-band Output and Input

Trade Mark of the DVB Digital Video Broadcasting Project

not be combined with:	Available for:
8	SK-IP, SK-DV, SK-TS
24	SK-IP, SK-DV, SK-TS
	SK-DV, SK-TS
	SK-DV, SK-TS
2	SK-DV, SK-TS
	SK-DV, SK-TS

#### Cannot be combined with:

SK-IP, SK-DV, SK-TS
SK-IP, SK-DV, SK-TS
SK-IP, SK-DV, SK-TS
